CHERRY HILL COMMUNITY COALITION

# Reclaiming the Right-of-Way for People and Place

## *Seabury between Cherry Hill & Bridgeview*

Through the INSPIRE planning process, residents showed overwhelming support for Department of Planning to use bond funding to turn the vacant lot at Cherry Hill and Seabury into an accessible and landscaped pathway. Infrastructure improvements made by the City will provide a canvas for community-designed personal elements.

### **Phase 1 (City): Improve the Right-of-Way**

Focus on pedestrian safety, accessibility, and creating a space for public activity. Elements include:

- Closing a portion of the alley parallel to Seabury
- Extending the sidewalk on Cherry Hill
- Grading and paving the existing path
- Adding lighting
- Refreshing the crosswalk on Cherry Hill

### **Phase 2 (Community): Personalize the Space**

Improvements can incorporate playful, educational elements added by community members. Ideas include:

- Signage (and naming the space)
- Landscaping
- Artistic elements
- Pathway and crosswalk art
- Almost anything you can think of!

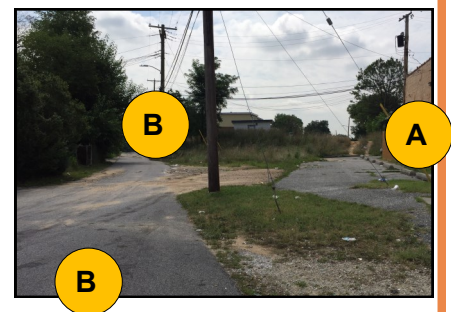

### **Timing: Starting Soon!**

The City aims to make initial safety improvements before school opens in fall 2018. This means closing the area to vehicles:

- Removing the wheel stops in the ROW (no parked cars)
- Placing flexiposts to close the ROW (no detour between Bridgeview and Cherry Hill; alley remains open)

Other City improvements should begin in the first half of 2019.
